

Piano hinges, stainless steel with stop

Item description/product images

Description

Material:

Stainless steel A2.

Note:

Piano hinges with stop at 65° offer an excellent solution for applications that require specific positioning. Made from high-quality stainless steel, they guarantee first-class durability and corrosion resistance, making them ideal for demanding environments.

These drilled hinges facilitate installation and offer a quick and reliable fastening solution. The stop at 65° enables the position of the hinges to be defined, which is particularly important for applications that require a specific opening or inclination.

Thanks to the precise design, piano hinges enable smooth movement and long service life without signs of wear. They offer a stable and reliable fastening solution for a wide range of projects and fulfil the most demanding requirements.
