

# Lateral spring plungers

## Item description/product images

### Description

**Material:**

Body mild steel.  
Ball steel or stainless steel hardened or POM.  
Spring stainless steel or plastic.

**Version:**

Body black oxidised.  
Ball bright.

**Note:**

The lateral spring plunger must be pressed into the hole to at least depth L3.  
These plungers are for positioning and holding small parts in fixtures. If mechanical machining of the workpiece is to be carried out, other clamps may be necessary.  
When the fixture is not in use it should be ensured that plastic springs are not under stress.

Spring force refers to a mean value.

**Drawing reference:**

- 1) knurl
- 2) light holding

## Drawings

Form A  
stainless steel ball, one side

Form B  
POM ball, one side

Form C  
steel ball, one side  
plastic spring

Form D  
steel ball, both sides  
plastic spring
