

Talon grips round

Item description/product images

Description

Material:
Steel.

Version:
Hardened (52+2 HRC) and black oxidised.

Note:

Talon grips are meant for installing into vice jaw plates. A tapped hole with counterbore is sufficient for the mounting. The sharp edges on the talons bite into the workpiece and prevent lateral and horizontal movement.

- Positive clamping for high cutting speeds.
- Low clamping height of 1.5 mm (saves material costs).
- The contour of the talons produces a slight pull-down effect.

Talon grips expand the application possibilities of your machine vice. Round, contoured and oversized workpieces can be quickly and securely clamped by using talon grips.

Drawing reference:

- 1) workpiece
- 2) clamping jaw
